### Sigmoid Capabilities - Experience in implementing data solutions in AWS

### Sigmoid has worked with more than Five large customers to design, build and deploy solutions in AWS

#### **Data Processing & Transformation:**

- Amazon EMR: Collaborative Apache Spark-based analytics platform used for big data processing and machine learning.
- AWS Glue: Fully managed ETL (Extract, Transform, Load) service for preparing and transforming data.

### **Data Storage & Management:**

- Amazon S3: Scalable and secure data lake for storing large amounts of structured and unstructured data.
- Amazon RDS: Managed relational database service for structured data storage.

#### **Data Ingestion & Integration:**

- AWS Data Pipeline: Creating data workflows that move and process data across AWS services.
- Amazon Kinesis: Real-time data ingestion from applications, devices, or any streaming data sources.

### Data Analytics & Visualization:

- Amazon Redshift: Data warehouse service used for analyzing large datasets with either serverless or provisioned resources.
- Amazon QuickSight: Business intelligence tool for creating interactive visualizations and reports.

### Machine Learning & Al:

- Amazon SageMaker: End-to-end platform for building, training, and deploying machine learning models.
- AWS AI Services: Pre-built AI services for vision, speech, language, and decision-making (e.g., Amazon Rekognition, Polly, Comprehend, Textract).

### **Security & Compliance:**

- AWS IAM (Identity & Access Management): Identity and access management service.
- AWS Organizations & AWS Config: Governance and compliance tools for managing AWS environments at scale.

Sigmoid's implementation of solutions in AWS involves leveraging a combination of services and tools tailored to specific business needs. Sigmoid would facilitate collaboration between data engineers, data scientists, business analysts, and other stakeholders to align the implementation with business goals and ensure success.

### 4 Pillars - Revenue Growth Management

Revenue Management (RGM) is the application of disciplined analytics that predict consumer behavior at the micro market levels and optimize product availability and price to maximize revenue growth.

### **RGM Visibility & Business Analytics**

Maintain right mix of products across channels, retailers & geography to optimize across profitability & service levels.

Identify the optimal pricing model for the product portfolio based on elasticities of price, distribution & weights.

Develop a balance in promotion activities for the portfolio considering promo sensitivity, its impact on the portfolio & the supply chain.

Design process to marry right retailers with right products while identifying apt incentives.

### **Data Layer**

**Data Lake** 

Ingestion

Consolidation

Harmonisation

Enrichment

Consumption

**Process Revaluation** 

### **Driving business growth through Assortment Planning**

### **B2B Order Recommendation**

- Identification of SKU level whitespaces through sales history analysis and similar store gap analysis
- Recommending products for each POS with store level forecasting models - for existing and new products along with quantity recommendations

**2-3%** uptick in portfolio profitability with an overall improvement in market share

### **Planogram Optimization**

- Providing the best planogram configuration within constraints to drive revenue, exploring possibilities of introduction of new SKUs
- Taking into account existing demand of products, lost sales, item attributes
- Scenario modelling wrt growth, profit, revenue maximization

**12-15%** improvement in revenues, with an increase in SKU s achieving days of sales

# Assortment Lifecycle Optimization

- Providing a lifecycle view of the movement of different categories, brands, products, assigning profitability buckets and accordingly realizing investment opportunities
- A competitive Growth Share Matrix and investment prioritization logic is defined in conjunction with business Insights & Sales teams

**3-5%** improvement in contribution margin with an improvement in market share

### One of the 4 pillars of Revenue Growth Management

### **Driving growth with Planogram assortment optimisation**

Client: Big Box Retailer Industry : Retail

#### **Business Problems**

Optimization of the planograms provided by Big Box Retailers which were not optimized & finding out opportunities to drive more revenue and days of sale

### **Analytics Solution**

Understanding the value chain to identifying growth avenues through a consulting exercise, this led to identification of shelf optimisation.

- Similar stores were grouped together in clusters
- Opportunities were identified in similar stores where similar SKUS could be sold.
- Forecasting Model was created to identify future Sales opportunities
- For different scenarios pertaining to growth, profit, revenue maximisation etc optimisation algorithms were explored that identified optimum configuration of products at cluster level

#### **Expected Business Value**

Solution led decision making demonstrated

- 11 % improvement in Revenues
- 2% improvement in SKU's achieving days of sales.

### One of the 4 pillars of Revenue Growth Management

### Reducing SKU-location whitespaces through Intelligent B2B Order Recommendation

Client: F&B CPG Company Manufacturer Industry: CPG/Manufacturing

#### **Business Problems**

Presence of SKU-location whitespaces in many retail locations & subpar Inventory Turnover.

### **Analytics Solution**

Developed a recommendation engine to eliminate SKU-location whitespaces and enable intelligent order creation

- Performed Data Collection followed by feature extraction and whitespace identification in order to perform sales history analysis and similar store gap analysis
- Built hybrid recommendation model for new products or white spaces which provides new product recommendations for each POS
- For existing products, performed product ranking and then feed to the quantity estimation model.
- Performed recommendation optimization which delivers output-Optimal Order Quantity, No of new products,
   Product Ranking, Strategy selection

### **Expected Business Value**

- 1.5% improvement in portfolio level profitability.
- 2 % market share improvement in organized Trade Snacks Category.

### One of the 4 pillars of Revenue Growth Management

### Identifying Investment Opportunities by Assortment Lifecycle Intelligence Framework

Client: F&B CPG Company Manufacturer Industry: CPG/Manufacturing

#### **Business Problems**

- Declining Market Share in Snacks Category in Organized Trade Channel.
- Absence of lifecycle view of the movement of categories, brands & products to understand current Situations

### **Analytics Solution**

Gained lifecycle view of the movement of categories, brands & products across various investment & profitability buckets designed based on their growth rate & their relative market share

- Defined a competitive Growth Share Matrix and investment prioritization logic in conjunction with business Insights & Sales teams
- Focused on daily data at granular levels to assess the performance of similar lines/plants and recommend actionable insights
- Model outputs & real world scenario matching was tested weekly across 2-months duration

#### **Expected Business Value**

Solution led decision making demonstrated

- 3% improvement in contribution margin on an average across whole Snacks assortment.
- 0.8% uptick in country level market share.
- Development of easy to identify competitor insights to enable agile counter strategy development.

### Sigmoid's Engagement Models

#### **Project Based**

### Staff Augmentation

#### Hybrid-Flexi Model/Data Labs/CoE

- Starts with consulting/scoping (2-3 weeks)
- Delivery Program Management
- · Interim review
- Success criteria met and IP handover
- Option to continue with product support
- · Fixed bid contract
- 3-5 months duration given complexity of problem

#### **Benefits**

- Cost effective
- KPI/SLA/Outcome driven
- Suitable for Fixed scope of work
- · Less overheads

- Understanding of skill requirements
- · Profile match and rate card
- · Onboarding and monthly billing
- Focused training based on client tech stack
- Project Management support
- 10% backup resources unbilled and trained

#### **Benefits**

- Scalability
- · Flexibility in resourcing
- · Ability to change/redefine scope

- Mix of project and staff augmentation engagements
- Requirement gathering
- Requirement classification as project or staff augmentation
- Joint delivery plan
- Secure resources internally from Sigmoid and bill monthly
- · Dedicated PM, Engineering Managers
- Dedicated Management Consultant(s)
- Dedicated Team Leads and Product Owners

#### **Benefits**

- · Cost effectiveness by focus on output
- Ability to change/redefine scope/Change requests
- Risk/Reward linked to KPI/SLA

### **Implementation Roadmap**

Implementation will be completed in continuous Waves, aligned with Goodyear's Region x BU prioritization

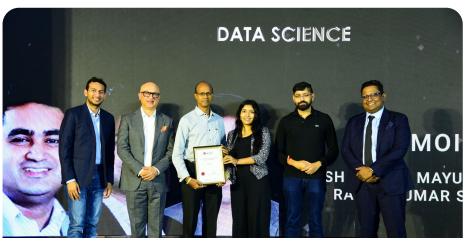

Project Phase	Aug 24	Sept 24	Oct 24	Nov 24	Dec 24	Jan 25	Feb 25	Mar 25	Apr 25
Initial Setup Team Onboarding Infra, Cloud & Data Source Access, Access creation Kick-off Stakeholder Identification Project Governance setup									
<b>Discovery</b> Report Inventory and Assessment, Report categorization based on complexity, Report prioritization, Migration Roadmap, Stakeholder alignment and sign-off									
<b>Build</b> Metadata extraction from Cubes/Framework Managers, Metadata extraction from reports, Semantic/Business layer creation, Data connection to Power BI, Data model creation in Power BI, Business logic transformation into DAX, Report creation in Power BI, Report Validation			Continuous reports relea				rith		
Test & UAT Dashboard functionality checks, Report UAT in dev environment, UAT fixes and sign-off, QA documentation and sign-off							44-14/		
<b>Deploy</b> Dashboard deployment in Prod, Change Management, User Demos (Power Users), Documentation and Hand-over,				elease 🗡	2nd Wave Release 🛨	ppe:	4th Wave Release	Release  Phase 2 Es	Releas
Hypercare & Sustainment Sustainment, User Demos (Wider audience), User Training on Dashboards				3,000	Priority Rep	oorts		4,500 R	eports
